Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This application is a 371 of PCT/IN03/00232.

Claims 1-13 are pending.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 4-6, 8-10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Dubroecq et al. US 4,357,337.

See col. 9, example 4, pyridylmethyl indanone, acetic acid, platinum oxide and hydrogenation under 1 bar anticipated the instant claims 1, 4-6, 8-10. Col. 13, example 10 anticipated claim 2.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-12 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Vidyadhar et al. US 6,649,765 (cited on 1449).

See col. 3 example 1 anticipated the instant claims. Please note that 30 psi is 2.068 bar.

See. Col. 4, example 2, the further step of N-alkylation also anticipated the instant claims 11-12.

Art Unit: 1625

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dubroeuq et al. '337 or Vidyadhar et al. '765 in view of Iimura US 6,252,081 (cited on 1449).

Dubroeuq '337 or Vidyadhar disclosed anticipatory process against the claims when Y is H. Iimura '081 evidenced that when Y is nonhydrogen, similar reaction will take place. Since F is an generally inert substitution, it is expected that the broader scope of the claims when Y is F would operate in similar manner as the unsubstituted indanone thus would be prima facie obvious over the known process in absence of unexpected results.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Celia Chang, Ph. D. whose telephone number is 571-272-0679. The examiner can normally be reached on Monday through Thursday from 8:30 am to 5:00 pm.
